在中美貿易戰和新冠肺炎的雙重衝擊之下，今年是製造業最艱困的一年。時勢造英雄，在快速動盪的嚴峻情勢中，要恭喜獲選臺中市中小企業最高榮譽 - 「2020第十九屆臺中市金手獎」的17家績優企業，逆流而上，堪為表率，成為構築臺中市經濟榮景的中堅力量。

臺中市有六大產業，豐沛的「後廠」能量源源不斷地注入地方經濟發展。在疫情期間，臺中市政府透過推動「輕稅簡政」，大幅調降地價稅及積極開工興建臺中國際會展中心等軟硬體建設執行，加強中小企業行銷世界之競爭力。金手獎得主更克服萬難將企業營運得有聲有色，不僅是臺中市「黑手」中的「隱形冠軍」，更是當之無愧的經營之神。

期望今年得獎的企業繼續努力，在臺灣經濟面臨衝擊時，願意投入社會公益，不僅造福員工、回饋社會，更讓臺灣的經濟好轉，是讓臺中市驕傲的城市之光。

Under the dual impact of the Sino-US trade war and the Covid-19 pandemic, this year has been the most difficult year for the manufacturing industry. Hard times make heroes. In these extreme circumstances of rapid change, congratulations go to the 17 high-performance enterprises that have been selected for the highest honor given to small and medium-sized enterprises in Taichung City - "The 19th Taichung City Golden Hand Award", in 2020. It can be rightfully stated that these businesses constitute the backbone of Taichung's economic prosperity.

There are six major industries in Taichung City, and abundant small factory energy is continuously injected into local economic development. During the epidemic, the Taichung City Government promoted "light tax and simplified administration", drastically lowered land tax and actively started construction of the Taichung International Convention and Exhibition Center and other software and hardware construction projects to strengthen the competitive international marketing of small and medium-sized enterprises. The winners of the Golden Hand Award have overcome all difficulties to operate their companies successfully. They are unseen business heroes in Taichung City.

I hope that this year's award-winning companies will continue to work hard and be willing to invest in social welfare when Taiwan's economy faces challenges. This will not only benefit employees and give back to the society, but also make Taiwan's economy turn for the better. These companies are the lights of the city that make Taichung proud.

Mayor of Taichung City

中小企業是臺中經濟的根本，臺中市金手獎今年已邁入第十九個年頭，對於獲獎的17家在地績優廠商，不僅給予掌聲祝賀，更多的是感謝這些中小企業為地方產業發展的奮鬥與努力。

「大成功靠團隊，小成功靠個人」，經營有成的企業絕非一蹴可幾，實地訪審的過程中，我看見企業全體同仁為了金手獎評比兢兢業業，上至高階主管下至基層員工，都以企業的榮耀為己任，令人感到驕傲與感動。

企業的運作如同一部精密機器的組成，儘管是一顆小螺絲釘，仍為自己認同的使命努力著；更象徵中小企業每個小人物，在自己的產業裡默默打拚，也能躍上國際市場上發光發熱。

金手獎的選拔實屬嚴格，評選的過程，可見臺中人刻苦耐勞、努力拚搏的精神。許多「黑手頭家」少年時白手起家，至今仍是兢兢業業，發揮「匠人精神」堅持100分的產品。而已傳承至下一代的企業，接棒的第二代企業主則致力於研發創新、提升品牌競爭力，持續活絡著產業。

相信這些「臺中之光」未來絕對能持續在國際市場上發光發熱，並期盼所有優秀的中小企業繼續用最頂尖的技術、最優秀的產品拚經濟，一同為臺中的「金手」產業共生共榮。

Small and medium-sized enterprises are the foundation of Taichung's economy. This year the Taichung City Golden Hand Award has entered its 19th year. For the 17 award-winning local manufacturers, we not only give applause and congratulations, but also thank these small and medium-sized enterprises for the hard work and struggle that has gone into developing local industries.

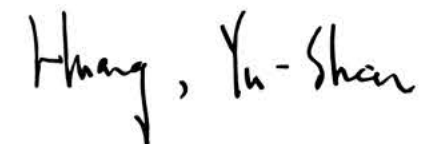

"Great success depends on the team. small success depends on the individual." A successful company is by no means created overnight. During the on-site inspection process, I witnessed all of the company employees working diligently for the Golden Hand Award, from high-level executives to lower-level employees. They all take the glory of the enterprise as their own responsibility. This was very moving, and makes me proud.

The operation of an enterprise is like a precision machine. Even a small screw still works hard for what it recognizes as its mission. It also symbolizes that each individual in the small and medium-sized enterprises can work hard in their own industry and can also leap onto the international stage glowing brightly.

The Golden Hand Award selection is strict, and the selection process allowed the working spirit of people in Taichung to be seen. Many workers started from scratch when they were young, and they are still working diligently, giving full play to their "craftsman spirit" and insisting on 100-percent products. For companies that have passed on to the next generation, the second-generation business owners who took over are committed to R&D and innovation, enhancing brand competitiveness, and energizing the industry.

In the future, these "lights of Taichung" will definitely continue to shine in the international market and I hope that all outstanding small and medium-sized enterprises will continue to use cutting-edge technology and the best products to improve the economy, and work side by side in prosperity, with our "golden hands".

WKPT was the machining department of World Known Mfg. Co., Ltd. Therefore, with over 30 years' experiences, WKPT is full with professional Knowledge in machining. Due to the organizational development needs, WKPT was acquired as a financially independent subsidiary by WKP(Cayman) in Nov.,2016. The products development direction has also evolved from being specialized in the processing of cast iron parts to being a complete solution provider for mastering multi-metal materials and multi-process integration.

The industry which we supply our products to evolves a wide range of industries, including wind power, construction machines, automobiles, agricultural machines and various other industrial fields. We not only supply the normal international standard specification parts, but also others' customized parts based on high-strength material. Moreover, we offer a variety of aluminum, steel, stainless steel, heat treatment and surface finishing if needed.

WKPT uses a variety of top-level precision machining equipment such as DMG MORI-NHX6300, NHX 4000, integrating OKUMA machine, COMAU six-axis robotic arm and inspection kits to an automatic line ... etc. Also, using advanced CAD/CAM software CATIA, WKPT design the fixtures & gages by itself to provide the customer the competitive products with best quality and fast lead time. The products include the yoke for wind turbine, flywheel housing, exhaust and intake manifold, gear case, pump housing, brackets of engine and chassis, and steering arm assembly...etc.

WKPT is an IATF 16949 & ISO9001 certified organization. And we adhere to the spirit of continuous improvement and sustainable development, and it drive us to provide the most reliable service for our worldwide customers.

SHARP-EYED 千里眼精密部件股份有限公司

公司於1983年由王金倉先生成立，從家庭式的桌上型車床代工一點一滴的進步為自動化生產工廠，因應現代科技公司轉型為客製化車銑複合零件開發、大規模自動化生產的專業金屬件加工廠。這37年的進步與改變來自於方向決定了就放手去執行，在這些決定的背後有員工的專業度與任何時候都要超越自身的信念支撐著，一直到今天。

「客戶第一，品質至上」，對千里眼來說，不是一個口號。

「以客為尊」是千里眼三十多年來所堅持的優良傳統。即時報價、快速打樣、高規格品質及為客戶解決問題 並提供專業的後處理

加工完善客製化一條龍代工服務是千里眼服務客戶的主臬。

本次能夠獲選「第十九屆台中市金手獎-績優中小企業選拔表揚活動」績優企業，深感榮幸。除了感謝委員們的肯定，更感謝一直以來千里眼全體同仁的付出。放眼未來，持續追求穩定品質與創新技術，不斷地致力於多元產業的發展，展現行銷全世界之運籌布局。千里眼秉持「認真、負責、以客為尊」之經營理念，努力開發全球市場，強調以低成本、高品質以及高產能來滿足客戶需求，創造出雙贏的局面。

經營哲學

A到A+只是過程，適度退回A就會不斷追求卓越。

Sharp-Eyed was founded by Mr. Wang Jincang in 1983. Our company started from a family-style desktop lathe to an automated production factory. In order to meet the needs of modern technology, the company transformed into a professional metal parts processing factory for the development of customized turning and milling composite parts and automotive production. The progress and changes in the past 37 years have come from the implementation of the direction decision. Behind these decisions is the professionalism of the employees and the belief that they must surpass themselves at all times.

"Customer First, Quality First" is not a slogan "Customer First" is a fine tradition that Sharp-Eyed has adhered to for more than 30 years. On time quotation, rapid sample delivery, high-spec quality and problem-solving for customers, as well as professional surface finish, perfect and customized services are the criteria for Sharp-Eyed.

It is a great honor to be selected as a high-performance company in the "Nineteenth Taichung City Golden Hand Award-Excellent Small and Medium-sized Enterprise". In addition to thanking the committee members for their affirmation, I also thank

Zhan Yi Co., Ltd. operates based on die-casting manufacturing, innovation and service, and excellence has always been our goal, including peripheral processing, such as 4-axis CNC machines, grinding, sandblasting, assembly and so on. From the very beginning, our intention was to become a manufacturer with a clear positioning in a niche market, "Maybe we are small, but we can do better." We not only want to develop the domestic market but also hope to expand our presence in overseas markets, and have participated in trade fairs in Brazil, Panama and Shanghai, and traveled to all ASEAN countries.

Committed to innovation and breakthroughs all along, the company has been focusing on discovering needs and solving problems in order to make the corporate culture unrestricted and full of flexibility, and the company's strength is not the product but the way of cooperation that exceeds customers' expectations. Only by doing and thinking more than the clients can we break with the status quo in the competitive environment.

AC Auto Cam 歐權科技股份有限公司

歐權擁有獨立開發、設計之能力，獨特的雙包絡凸輪曲線能使五顆滾子對稱齧合，有面壓受力穩定、剛性強等優點。除獨立設計、開發能力外，還擁有自製加工的能力，使用自組的專用加工機生產各式各樣規格的凸輪，並自行完成軸承預壓與滾子分割、齧合凸輪的組裝程序，從設計、加工生產到組裝都在本公司內部完成，能精準的掌控產品精度與品質。

歐權是國內第一大滾齒凸輪研發製造商，全球唯二製造商，應用自有專利技術核心元件-滾齒凸輪進行客製化分度盤與相關產品開發，注重產品品質無虞並達到零背隙、高剛性、超耐久及低磨耗等多種特性。凸輪應用領域廣闊，涵蓋汽機車配件、5G產業、生醫產業，皆能透過我司產品提升加工工藝來完美詮釋曲面加工、精細加工等需求。

累積近20年關鍵零組件製造經驗，專業生產與銷售各式凸輪作為核心之精密機械製品。產品包含「無背隙滾齒凸輪之高精密數控分度盤」、「刀具交換機構」及「高精密間歇分割器」三大類，銷售市場為國內外工具機大廠。

自2015年開始進行TPS精實生產管理，提升生產效益並擴散至供應鏈及產業鏈，佈局智慧機械建置共存共榮產業鏈體系。

經營哲學

「堅持、創新、成長」，沒有最好只有更好。

Autocam has the ability of independent development and design. The unique double-envelope cam curve can make five rollers symmetrically mesh, and it has the advantages of stable surface pressure and strong rigidity. In addition to independent design and development capabilities, it also has the capability of self-made processing. It uses self-assembled special processing machines to produce cams of various specifications and completes the assembly procedures of bearing preloading, roller division, and meshing cams. Design, processing, production and assembly are all completed within the company, which can accurately control product accuracy and quality.

Autocam is the world's only two hob cam research and development manufacturer, applying its own patented technology, the core component-hob cams for customized four- and five-axis indexing discs and related product development, and pays attention to product quality. Timing, output torque, reduction ratio, and achieve zero backlashes, high rigidity, super durability, high rigidity and low wear and other characteristics. The cam application field is broad, and the processing application covers the automobile

and motorcycle accessories, 5G industry, and the biomedical industry. The high-precision grinding characteristics meet the customer's requirements for the surface roughness and curved surface of the processed components.

Autocam has accumulated nearly 20 years of experience in manufacturing key components and specializes in the production and sales of various precision machinery products with cams as the core. The products include "high-precision CNC indexing plate for backlash-free hob cam", "tool exchange mechanism" and "high-precision intermittent splitter". The sales market is large domestic and foreign machine tool manufacturers.

Since 2015, TPS has been implementing lean production management, improving production efficiency and spreading to the supply chain and industrial chain, and deploying smart machinery to establish a coexistence and co-prosperity industrial chain system.

hinko 欣閣興業有限公司

欣閣創立於1992年，初期以室內裝修業為主，洞察居家產業的變化與市場的需求，成立系統櫥櫃工廠，隨市場潮流調整公司策略，持續經營產品提升及業務行銷兩大面向的突破。

系統櫥櫃製造業的關鍵無非為產品質量及設計創新，欣閣將工業智慧化概念導入系統櫥櫃的生產流程，也引進生產管理軟體，期待科技的革新為公司及消費市場帶來更好的櫥櫃工藝。

欣閣提供的不僅是系統傢俱產品，更有完善的整體服務：從居家設計、諮詢討論，到生產安裝、售後服務，皆有完備訓練的專業人員，除了產品工藝獲得肯定以外，「創新、專業」更是展現價值之處。

榮獲事蹟
參加金手獎評選，深刻感受企業要成長尚有許多地方要學習，更重要在企業管理與行銷要並重發展，很感謝評審委員的建議鼓勵，除了再接再厲讓企業茁壯，也會做好企業責任，為社會盡最大心力與付出。

經營哲學

認真的人可以改變自己，
堅持的人可以改變命運。

陳文彬/董事長

Brief introduction of the company
Hinko was founded in 1992. At the beginning, it focused on the interior decoration industry. It has insight into the changes in the home industry and market needs, established a system cabinet factory, adjusted the company's strategy according to the market trend, and continued to operate product upgrades and business marketing breakthroughs.

The advantages and advantages of the company
The key to the system cabinet manufacturing industry is nothing more than product quality and design innovation. Hinko introduces the concept of industrial intelligence into the system cabinet production process and also introduces production management software. It is expected that technological innovation will bring better cabinet technology to the company and the consumer market.

Why won the award (the product is powerful)
Hinko provides not only systematic furniture products, but also comprehensive overall services: from home design, consultation and discussion, to production and installation, and after-sales service, there are well-trained professionals. In addition to the recognition of product technology, "innovation, "Professionalism" is where it shows value.

Participating in the selection of the Golden Hand Award, I deeply feel that there is still a lot to learn about the growth of a company, and more importantly, the development of business management and marketing must be equal. I am very grateful to the review committee for their suggestions and encouragement. In addition to making persistent efforts to make the company strong, it will also do its corporate responsibility. Do your best for the society.

WEBB LTD. has established in Taichung, Taiwan for more than 24years. We recruit local employees and jointly recruit talents with local technical schools to give full play to the flexibility of SME (Small and Medium Enterprise). We combine the high-standard production of Japanese customers to produce top-notch transformer which is Made in Taiwan only. Moreover, we have invested constructively in research and development, so in 2020 we obtained the certified quality management system ISO-900:2015 and the American UL standard.

WEBB produces the following items, including toroidal power transformers, isolation/auto transformer, three phase transformer, EI transformer, Inductor, CT (current sense transformers), High frequency transformer and so on. As a transformer in power world, toroidal transformer takes its own advantage (high efficiency, small volume, easy to install, low noise, etc.) to take place a lot market share of lamination transformer.

All our products are customized. However, we don't have a minimum order quantity requirement and can manufacture at least one. We always keep this service concept to cooperate with our customer. That is why customers are very happy to work with us. When developing any new product, they will find us at the first time. In addition, we are always involved in their entire development process, which becomes the help of our business promotion. Staff work together to achieve the highest attitude and teamwork spirit. We provide small-volume production without MOQ required. Meanwhile, we also provide ODM, OEM& OBM production modes and various design solutions to meet different customer's requirement.

SMATECH 順心企業股份有限公司

自 1990年創業以來，公司以人為本，從事著管理與服務；讓員工成為企業的夥伴，做好技術與事業的傳承，讓順心成為客戶的最佳夥伴，熱誠真實的提供所知服務客戶；這就是我們最誠實的理念。

而融合新科技與固有經驗，創造最適當的設備，是我們從事開發的精神。

『設計與研發』是讓公司能不斷的向前推進及成長的動力；抱持創新研發的信念，及了解市場的需求，順心發覺智慧自動化機台的研發與設置勢在必行；因此研發出多項自動化加工機械等設備，也獲得多項專利。

透過研發創新持續改良升級設備，使其加工更加便利，在過程中也減少廢棄物與汙染。

在這條路上，我們不會停，透過創新研發的能量與資源，結合終端使用夥伴，進一步提升產品競爭力的同時，期望能在國際上站穩腳步，開拓新藍海。

Founded in 1990, SMATECH has always put "people" in the forefront as the golden rule of management and services. All employees are treasured as important cooperators with whom we collaborate to offer superb services to our clients, better demonstrating our core value. Clients, too, are our most invaluable partners, to which we provide honest, comprehensive advice based on our 30+ years of knowledge in the industry.

In the wake of technological advancements, we dedicated countless hours into market research and strived for innovation: a focus on automatic control machines. After a strenuous creative process, we have developed a repository of various automatic control systems and obtain numerous patents.

Research and Design has been and will always be the propellant that keeps on pushing us towards progress--whether to continuously adjust our designs, to reduce pollutions and industrial waste during the operation, or to simply offering more convenient processing to our clients.

Along the journey, we will continue to seek out innovative ways to utilize resources. Combined with effective cooperation with clients and non-stop enhancement of product competence, we aim to become a prominent international player in the field.

INNOVATOR

龍德機械工業有限公司

創 立於 2002 年，由張銀恭總經理繼承父親數十年木工機械生產經驗，帶領團隊踏入技術門檻較高、市場競爭較少的木皮加工產業，生產各式木皮貼合相關機械設備。創業隔年立即取得 CE 及 ISO 9001 認證，以提供最精進、最創新的產品和最佳的服務品質，在面對市場的諸多激烈競爭及多變的市場需求裡，龍德公司研發策略致力開發高附加價值產品，在有限的資源與人力下，公司研發目標奠基於木皮拼接技術上，朝向成為木皮拼縫設備製造領導廠商前進，並提供完整的系統整合技術及解決方案，提升市場競爭力。

2008 年金融海嘯衝擊，公司營運面臨前所未有的危機，在各行業都陷入愁雲慘霧之際，龍德公司卻進一步獲取歐洲知名木皮剪切機製造商 SAVI 公司（美國及英國市占率最高之木皮剪切機生產廠家）之技術移轉（含品牌使用權），讓原只生產拼縫機的龍德公司有能提供客戶「一站購足」的服務方案。

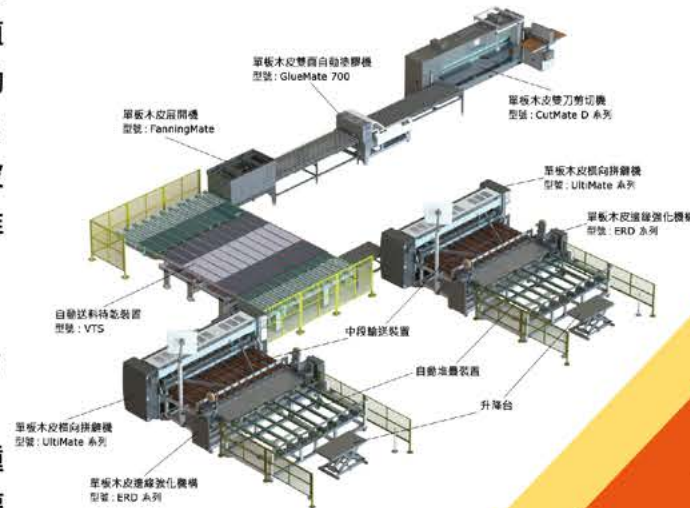

近年來全球森林資源逐漸減少及環保意識高漲的趨勢下，家具製造業等實木製品發展受到限制，木材價值日益上升，加上人力成本不斷上升，製造業朝向自動化生產模式，有鑑於此，龍德公司於 2015 年開發出智慧自動化木皮加工整線設備，成為亞洲第一家木皮自動線設備的製造廠家，全球木皮拼接技術排名更推進為前三大。

憑藉專業製造技術，截至 2019 年，龍德公司已擁有數十個全球經銷代理商，超過千台機器已銷售至 40 餘國，不止於此，龍德公司持續研發更多樣化的機種滿足客戶的需求，拓展成為木皮加工設備製造的先驅者，與客戶一同攜手創造雙贏的局勢，立足全世界。

經營哲學

我們比較不擔心世界經濟景氣何時復甦，我們擔心的是當下一個春天來臨時，龍德準備好了嗎？

In 2002, Ian Chang, General Manager of INNOVATOR Machinery, led the team into the veneer processing industry of higher technical threshold and less market competition with his father's decades of experience in woodworking machinery production. The next year, INNOVATOR Machinery is CE and ISO 9001 certified in order to provide veneer processing equipment with excellent quality and service.

In many competitive and variable market demands, INNOVATOR Machinery is committed to developing high value-added machinery on the basis of veneer splicing technique and becomes one of the leading veneer splicing machine manufacturers. INNOVATOR Machinery specializes in designing, manufacturing, marketing and servicing various kinds of veneering machinery including guillotines, splicers and other veneer processing equipment for door, furniture industries, etc. and even offers complete system-integrated technology and solutions to enhance market competitiveness.

張銀恭/總經理

In 2008, the year of global financial crisis, all industries were impacted, but we took a big step further to acquire the brand use rights and the technology of Danish SAVI Industri A/S, a well-known brand globally in veneer guillotine field. Now, we are the first manufacturer of Smart Veneer Faces Production Line with "one-stop shopping" service in Asia.

With professional manufacturing technology, more than 1,000 machines have been marketed to more than 40 countries till 2019. Furthermore, we continue to develop more diversified models and contribute to a veneer processing equipment manufacturing pioneer to create a win-win state with customers.

Shin Wei Sheng Machine Co.,Ltd. was established in 1993 and has nearly 30 years of professional machinery manufacturing experience. Its business scope not only provides domestic business, but also exports to Southeast Asia, Japan, the United States, Europe, and other countries.

The whole plant has 58 latest CNC central cutting machines, lathes, turning and milling machines, horizontal DMG MORI NHX6300 and other equipment. With the latest CAD/CAM software technology and manpower training plan, the production process and construction methods are consistent, the quality is stable, and a deep industrial foundation is laid.

Quality control, in addition to the ISO9001 international certification standard, the factory adopts the most innovative British IMS three-dimensional and MITU-TOYO inspection equipment, and establishes a strict quality control system for incoming inspection, process inspection, independent inspection, and finished product inspection, which is deeply trusted by customers.

Successfully implement 2 sets of robotic arms and intelligent production technology. With the VMX

system, a heterogeneous network of machine-connected networks is built, a process database is integrated, and production visualization technology is used to ensure order acceptance and punctual delivery of customized products, thereby enhancing overall competitiveness.

And also because of the processing of the industry, it has expanded and extended such great number of products, which have also been successfully sold to various industries. Main business items are auto parts, bicycle parts, electric vehicle parts, food machine parts, wood working machine parts, and pneumatic parts.

U-START CO.LTD. Takes safety, healthy, science and integrity as business philosophy; we focused on a pragmatic attitude to establish a pharmaceutical factory-level production line that is higher than international food safety standards. We have established "close development cooperation" with academic institutions and medical units for a long time. It is our basic principle that our products must be used by our relatives at ease.

U-START CO.LTD. has a rare precision instrument analysis laboratory; is committed to academic development and quality control, and has a number of health care product carrier invention patents. We have been independently developed and fully academically verified health care raw materials.

In order to ensure consistent quality, we have

established a positive pressure dust-free clean production line, with Medical School, university presidents and other research elites in multilayer coating of tripeptides, bone cell regeneration, anti-oxidation of Phyllanthus emblica extract, and nerve repair. In recent years, we have developed new high-tech healthcare carrier technology, putting product quality in the first place. Although there is no gorgeous marketing method, products such as "Dr. Bone" and "Phyllanthus Emblica" have been obtained in Hong Kong, Macau, Taiwan, Australia, and Southeast Asia.

We uphold the spirit of seeking truth from facts, and endure the loneliness and hard pressure of the development process. Diamonds are colorless crystals composed of carbon elements. Under the pressure of self-requirements, carbon will transform into diamonds. We will bear the hopes of our customers and our self-concept, and we will continue to make progress with our original intention.
